

# Year 8 3D Design and Construction - Artists for Change

*You must be the change, you wish to see in the world.*  
– Mahatma Gandhi

In a time where design and making has become so significant students will develop knowledge and skills in sculptural construction techniques, forming process, exploring a range of materials such as wood, plaster, metal, textile, plastic and found objects. Through these techniques and processes students will develop creative formal responses to conceptual motives. The course includes elements of entrepreneurship and social justice.

Visual Diary:

Why should a student choose this elective?

Making a statement and creating change through the act of making students will explore entrepreneurship and social justice. Appealing to students who enjoy working with their hands, the course aims to give students an opportunity to further enhance their making skills, putting them at an advantage if they intend pursuing the visual arts/design in future years.
